- R12 Upgrades
- R12 Application implementations
- Functional and Technical Managed Services
- SOA
- Project Management
- Optimizations and Add Ons

**The customer has the control.
BIAS has the responsibility and capability.**

THE BIAS ADVANTAGE

BIAS has the right combination of experience, expertise, and knowledge of application development to architect, implement, integrate, upgrade, optimize and customize a solution to fit your needs. BIAS provides centrally managed remote consulting and support services from our own offices that span the entire lifecycle of the solutions we design and deliver. Our Off-Shore business offers top notch recruits with a proven track record of excellence. Our guaranteed services provide you with the same level of expertise and experience whether performed on site or remote. BIAS provides services from the beginning of this cycle through completion to ensure that the solution implemented will be aligned with the overall strategic goals of the customer.
