

Healthcare Solutions

Program Offerings

BIAS offers a comprehensive suite of solutions for our customers. Below are five industry quickstarts created specifically for healthcare customers. Please contact us for additional information at 888-907-0352.

DATA TRANSFORMATION ANALYSIS (DTA) WITH BIG DATA

Unstructured Data Condensed & Analyzed for Decision Makers in Real Time

- Capture & Translate Unstructured Data
- Analyze Data Feeds
- Consolidated Reporting
- Faster Diagnosis
- Adaptable, Secure & Compliant

EXA in the Cloud

Get the Power of Oracle Exadata in the Cloud. BIAS offers the family of engineered systems in a private cloud with flexible payment options (Monthly, Quarterly, etc) Data Center at your place or ours; a SaaS 70 Certified Datacenter with access from a secure connection

DATA INTEGRATION

Leverage your Existing Technology Investments by Making Them Work Together

MOBILE PORTAL Home Healthcare Portal

Home healthcare professionals visiting patients' homes, taking vitals and uploading data to iPad. Ability to work offline and upload data when wifi is available. Information can roll up the hierarchy from nurse to doctor. Information is secure and encrypted. Compliant with HIPPA regulations. Doctors can quickly search this information.

HAWG (Healthcare Analytical Warehouse Gateway)

Faster. Better. Cheaper. Processing of Medical Claims

- Claims & Clinical Matching
- Faster Claims Processing
- Central Repository for EMR
- Customized Reports
- DR & HHC Connectivity
- Adaptable, Secure & Compliant

Electronic Health Record (EHR) Access Log Analysis

Identify threats and suspicious access patterns. Isolate intrusions based on care teams and quickly scan patient / provider access over time.

Healthcare Solutions

Program Offerings

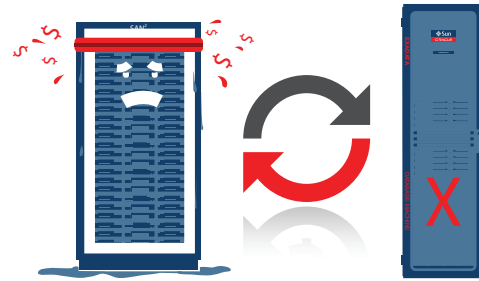

RE-ADMISSION ANALYSIS

Model re-admissions within 30 / 60 / 90 days and flag at risk patients before they are admitted.

LEGACY SYSTEM MIGRATIONS

Migrate costly legacy systems to new low cost platforms and enabled historical reporting, saving hundreds of thousands in maintenance.

REMOTE DEVICE MONITORING

Collect patient generated data from home devices and analyze to detect trends and warnings.
