NEW TO REAL APPLICATION TESTING?

Oracle Real Application Testing has been an integral part of BIAS professional services best practices and delivery since the testing suite was released by Oracle. Real Application Testing (RAT) gives the highest quality testing results based on production transactions and reduces the task of assessing the impact of systems changes for a production environment from months to days.

The BIAS Oracle Real Application Testing quick-start program is a condensed one week engagement that walks through each phase of an effective Real Application Testing Implementation including:

- ⇒ Real Application Testing Use Cases
- ⇒ Real Application Testing Technology and Architecture
- ⇒ Database Replay Functionality
- ⇒ SQL Performance Analyzer Functionality
- ⇒ Installing & Configuring Real Application Testing
- ⇒ RAT Best Practices
- ⇒ Creating and Executing RAT Test Plans
- ⇒ Documented Engagement Summary and Real Application Testing Best Practices

The BIAS Real Application Testing Quick Start Program is a fixed price engagement covering one week of focused knowledge transfer and implementation at a fixed cost of \$10,000.

BIAS Corporation is a recognized leader in Oracle architecture design, tuning, implementation, and management. As an Oracle Platinum Partner, BIAS provides experienced Architects and Developers to leverage Oracle Technology to solve complex business and technology problems. We're your one stop source for design, installation, and management of custom Oracle Application and Database environments.
