

# Big Data FOR BIG RESULTS

- ➔ Manufacturing stores and generates more data than any other sector; **nearly 2 Exabytes in 2010**
- ➔ Big Data has the potential to cut operating costs by nearly 50% in manufacturing organizations
- ➔ Leverage Big Data to improve product quality and safety; provide real analytics and metrics for a measurable ROI; identify opportunities for margin recovery; optimize resource allocation and enable collaboration across your entire value chain

## BIG DATA - YOUR PRIVATE CLOUD IN A BOX.

- Quickly and easily connect additional servers to meet your growing Big Data needs.
- Access a real time view of every node and enact configuration changes across your entire Big Data cluster from one location using Cloudera Manager.
- Grow your Big Data footprint while keeping your data center size small.

### BIAS CORPORATION

BIAS Corporation is a recognized leader in architecture design, tuning, implementation, and management. As an Oracle Platinum Partner, BIAS provides experienced Architects to assist with everything from identifying performance bottlenecks, to defining a long range system architecture plan to managing the purchase and implementation of the Oracle Engineered Systems.

To learn more about how Big Data can benefit you, please contact us at (888) 907-0352 or [info@biascorp.com](mailto:info@biascorp.com).

### The Most Complete Big Data Solution

#### ACQUIRE AND ORGANIZE

Oracle's Big Data Appliance eliminates the time-consuming efforts of choosing and configuring hardware, determining the proper open-source components and versions, and integrating and tuning the overall configuration. Pre-loaded and pre-configured with Cloudera and Hadoop, Oracle NoSQL and Oracle Linux allows for rapid implementation to begin acquiring data in weeks not months.

#### ANALYZE

Easily integrate Big Data into any Oracle 11gR2 database, including Oracle Exadata, using Oracle's pre-built Big Data Connectors. By providing efficient connectivity, Big Data Connectors enables analysis of all data in the enterprise – both structured and unstructured.

#### DECIDE

Leverage BIAS' industry templates, Oracle Exalytics and Oracle BI, or custom data warehouses and applications to rapidly analyze data and deploy data visualizations.
