

ORACLE E-BUSINESS SUITE *in the cloud*

In today's trending market & pressure to shift IT spend, companies are leveraging Cloud technologies to help solve their problems. A cloud solution has the ability to provide a vast number of benefits if the proper due diligence is performed, and this is where BIAS can help. BIAS has a broad portfolio for cloud services, ranging from: Consulting Services, Hosting Services, and Managed Services.

The Cloud Solution

The BIAS Solution offers significant value to your business. Our offering spans across the entire Oracle Stack providing a tremendous amount of flexibility in how IT support dollars are spent. This eliminates having to work with multiple vendors for technology solutions, saving time and money. No other service provider can offer this service at an amazing price point backed by our BIAS quality guarantee.

Hosting Services

Public, Private, Hybrid Models - BIAS offers a variety of cloud models based on your business and IT objectives.

PUBLIC - Cloud solution running on shared hardware

PRIVATE - Cloud solution running on dedicated hardware

HYBRID - Manage non-critical workloads in the BIAS public cloud while keeping mission-critical workloads internally

Managed Services

- Complete & Managed IT services for Customer
- Predictable Support Cost with Fixed Fee Services
- Onsite, Onshore & Offshore resource model
- BIAS PMO services
- 24x7x365 support from Atlanta and India offices

The BIAS Cloud

- R12 Upgrades
- R12 Application implementations
- Optimizations and Module Additions
- Functional and Technical Managed Services
- DBA Managed Services
- Infrastructure Managed Services

Why BIAS?

BIAS delivers solutions across the entire Oracle stack, using onshore/offshore capabilities, Managed Services and Hosting offerings, with an efficient, more cost effective turnaround than our competition.
