

BICS QUICK START

BIAS Business Intelligence Cloud Service

BIAS Corporation provides a faster way to realize returns on your investment in Oracle's Business Intelligence Cloud Services (BICS) and enables powerful Business Analytics capabilities for your business users in less than 2 weeks. The BIAS BICS Quick Start is geared towards helping your organization identify the strategy and roadmap on leveraging the Cloud BI for all your information sources, setting up the BICS environment with a subset of your data, building initial seed metrics for the business users, and providing your organization with the right mentoring and knowledge to drive further expansion at your desired pace.

Business Intelligence Cloud Benefits

- No capital investments required (No infrastructure setup)
- Short implementation period
- Customizable visualization and interactive reports and dashboards
- Minimal IT resources required

BIAS BICS Quick Start includes:

- Gathering business requirements and assessing existing infrastructure to determine how BICS can address your business needs
- Developing strategies and roadmap for data pipelines to import from on premise and cloud data sources
- Building data models leveraging best practices
- Leveraging best practices when loading data into the cloud
- Building visualizations and interactive reports and dashboards
- Multiple offerings depending on # of reports, dashboards, etc.
- Mentoring your end users and administrators for the following key functions
 - BICS Architecture
 - Security and Administration
 - Analytics, Visual Analyzer
 - BI Mobile
 - Data Modeler
