

BIAS

In today's trending market & pressure to shift IT spend, companies are leveraging Cloud technologies to help solve their problems. A cloud solution has the ability to provide a vast number of benefits if the proper due diligence is performed, and this is where BIAS can help.

BIAS has a broad portfolio for cloud services, ranging from: Consulting Services, Hosting Services, and Managed Services.

CLOUD CONSULTING SERVICES

- **TCO, Cost Recovery Model** - Alleviate IT Sprawl, One Provider, One Vendor
- **Roadmap Development** - Provide a detailed roadmap from current to the desired cloud state
- **Reference Architecture** - Provide the cloud topology from ground up (server, storage, network)
- **Workload Profiling** - Analysis workloads to align with proper cloud model
- **Cloud Maturity** - Assessment of the overall cloud majority and alignment with ITIL practices
- **Cloud Security** - Analysis of current security measures in place to ensure safeguarding your cloud with the proper security solution

CLOUD HOSTING SERVICES

- **Public, Private, Hybrid Models** - BIAS offers a variety of cloud models based on your business and IT objectives.
 - » Public – Cloud solution running on shared hardware
 - » Private – Cloud solution running on dedicated hardware
 - » Hybrid – Manage non-critical workloads in the BIAS public cloud while keeping mission-critical workloads internally
- **Oracle on Oracle** - BIAS provides a unique environment for you to host your Oracle applications and databases on our Oracle infrastructure. An Oracle on Oracle architecture has proven to drive efficiencies no other infrastructure vendor can provide.
- **Leverage BIAS Partners for Data Center Hosting** - BIAS partners with Tier IV, and Tier III data centers.
- **Migration / Planning / Execution** - Let BIAS migration services provide you with turn-key migration services from analyzing, planning, and executing migrations.

CLOUD MANAGED SERVICES

BIAS Managed services provides the assurance that your mission critical systems, applications, and databases are constantly monitored and managed to achieve targeted performance, stability, reliability, and availability 24 hours a day, 7 days a week.
