

BIAS has created the Oracle 12c Upgrade Program to help customers migrate their existing databases to the latest version - Oracle 12c. Whether you're preparing your environment for Exadata or just looking for the latest features, BIAS provides you a turnkey approach to upgrading to 12c. Our processes have been developed and refined over the past 15 years to create the BIAS Rapid Upgrade Methodology (B.R.U.M.)

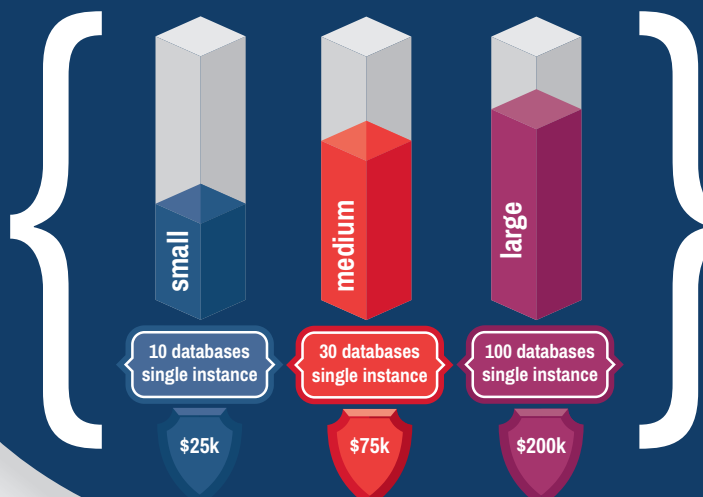

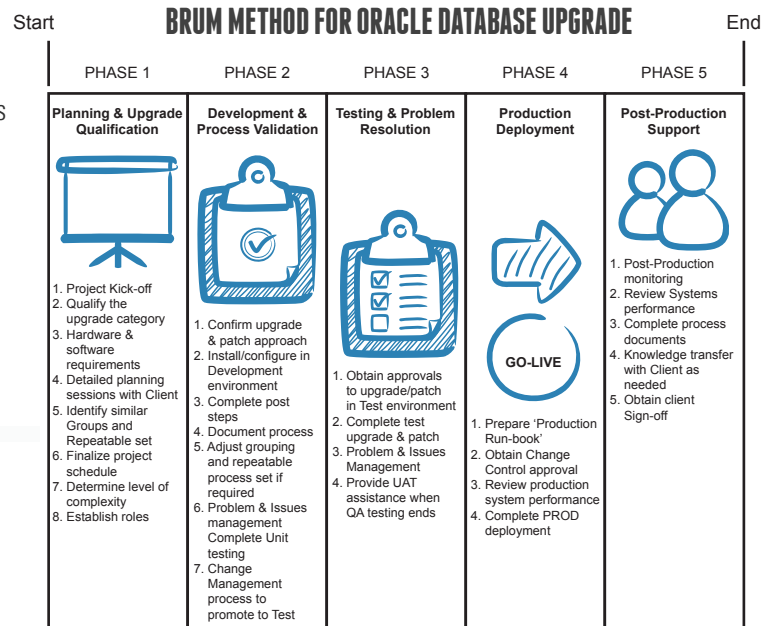

THE PROGRAM INCLUDES:

- Bottom-Up systems architecture review & blueprint that covers the Storage, Server, Operating System, Database, Network, Application Technology Middle Tier and Applications.
- BIAS presents all of your optimal Upgrade Options and also recommends the best fit for your environment. This allows for the most cost-effective and schedule-effective options to be provided to you.
- Upgrade Options include usage of cutting edge Oracle technology like Oracle GoldenGate, Real Application Testing or the process based Upgrade using DBUA.

UPGRADE & CONSOLIDATE TO ORACLE DATABASE 12c
