WHAT IS SOA?

Leading companies are tackling the complexity of their application and IT environments with Service-Oriented Architecture (SOA), which facilitates the development of modular business services that can be easily integrated and reused—creating a truly flexible, adaptable IT infrastructure. With a SOA approach, your IT organization will focus more resources and budget on innovation and on delivering new business services.

BIAS embraced Service Oriented Architecture long before Oracle acquired Colaxa in 2004. But it was only after the acquisition that we moved from simple web-services administration to a full BPM methodology with the Oracle SOA tools. Our engineers worked with Oracle to develop some of the first tools within the SOA suite of products and as a result, we were the first to implement these products in the market place.

Our customers benefit because they now have the ability to create new application functionality and entirely new lines of business with SOA. Helena Chemical's B2B exchange and Corrections Corporation of America's integrated Justice System were two industry defining solutions that we helped to create in 2004 and both of these systems are still in production today.

Since then, we have deployed hundreds of SOA solutions for the Federal government and commercial customers world wide.

Please see BIAS' Notable SOA Achievements on pg. 2

BIAS' NOTABLE SOA ACHIEVEMENTS

- First to develop a trading hub architecture using Oracle's BPEL Process manager
- First to develop / deploy Oracle BPEL with Oracle Applications
- First to deploy the Oracle E-Business Suite adapter for Oracle BPEL
- First to develop an integrated Justice system, allowing the criminal justice system to share inmate records between federal, state, local and private prison systems. This is the first system of its kind and is lauded throughout the industry as a means to better track the inmate's criminal and medical records
- BIAS is recognized by Oracle Development as the premier solution integrator for Oracle's BPEL and BAM technologies
- BIAS was the first consulting group to work with Oracle's BPEL and BAM technologies
- BIAS was nominated for Solution integrator of the year at this year's Oracle OpenWorld for our work with Oracle BPEL
- Oracle Partner Network Specialized - Service-Oriented Architecture
- Oracle Pillar Verified in SOA, BI & Architecture
- Oracle E2.0 Blazer Portal Fusion Award presented to BIAS at Oracle OpenWorld two years in a row
- Oracle Excellence Award for Innovation presented to BIAS at Oracle OpenWorld two years in a row
