

CHARGE THE CLOUD

BIAS Quick Start Cloud Advisory Services

Oracle Cloud has set the bar for the most comprehensive solution for organizations to reduce cost and increase performance, reliability, and security of applications and systems that are currently on-premise.

Congratulations! You took the first step on the way to leveraging the Cloud through the acquisition of Oracle Cloud Credits and BIAS can help guide you through proven best practices for high-value, low risk implementations of Oracle Cloud.

BIAS Quick Start Key Deliverables

- Blueprint Architecture of your current systems and databases with respective workloads, dependencies, and service level agreements (SLA's).
- Recommendations on what systems should move to the Oracle Cloud and what systems are better left on-premise based on dependencies, regulatory requirements, and potential cost savings.
- Architectural design of your new Oracle Hybrid Cloud with operational recommendations for seamlessly managing internal and external systems as one.
- Detailed Migration roadmap for Low Risk, Zero-downtime migrations to the Oracle Cloud.
- Detailed Integration blueprint for seamlessly integrating Oracle cloud with on-premise data.

Key Benefits

- Leverage an architecture viewpoint that spans from applications to disk – across public, private and hybrid deployment models.
- Reduce the risk and get your cloud right the first time by utilizing the best practices and expertise to take the Oracle stack into a cloud environment.
- Accelerate your cloud adoption and get the business value faster.

Why BIAS?

As one of the few truly Cross Stack Oracle Platinum partners, BIAS has built a strong reputation for solving complex business issues through the creative use of Oracle based technologies. BIAS has developed and delivered award-winning solutions across infrastructure, database, custom application development, data warehousing, reporting, Oracle applications, and Managed services. Each of these solutions was designed and built on the same industry standard technologies that are leveraged on the Oracle Cloud. In addition, BIAS has deployed these solutions on Public Clouds, Private Clouds, and Hybrid Cloud Models over the last several years. So if you are looking to quickly realize the full value and promise of the Oracle cloud, while reducing risk, there is no better choice than BIAS.

Key Features →

- Analysis of on-premise systems, architecture, and workloads
- Recommendations on cloud candidates based on business-value, cost reduction, and SLA's.
- Hybrid Cloud Services design and blueprint
- Integration and migration roadmaps

Additional Benefits →

- Decreased Capital and Operational Cost
- Rapid Deployments
- Predictable Performance, Reliability, and Disaster Recovery
- Best In Class Security
- Integration with on-premise systems

Services Covered →

- Software as a service (SaaS)
- Platform as a service (PaaS)
- Infrastructure as a service (IaaS)

Fixed Price Offerings starting as low as \$10k
