E-Business Suite Migration to Oracle Cloud (OCI)

ORACLE

Global
Excellence
Award Winner.

2019 OCI Partner of the Year

ORACLE APPS ON ORACLE CLOUD

Not yet ready to move to SaaS applications? Many of the transformational benefits for moving to the cloud can be realized via a 'Move and Improve' of your E-Business Suite (EBS) environment to OCI. BIAS has the expertise and experience as proven by our customer references to lead you in this transformation and provide ongoing managed services for the environment.

KEY BENEFITS

- Reduce support costs **by 20-50%** and avoid hardware refresh cycles and related capital costs.
- Dramatically improve performance by **200-600%** and enable higher SLAs (e.g. **99.9999%** availability) to your business.
- Expand capacity in **minutes vs. weeks** and avoid paying higher costs for seasonal peak processing.
- Provision or clone new environments **in a few hours vs. days** or weeks.
- Reduce risk through **near-zero downtime** for database RTO and RPO disaster recovery and improved compliance.
- Accelerate migration project execution by **50% or more** & reduce project risk through our repeatable processes and automated Migration Factory Platform.

KEY FEATURES

- Define a migration approach that meets your requirements & prepares your IT team to leverage the Oracle Cloud for rapid provisioning and running mixed workloads.
- Leverage our functional and technical applications expertise for migrating integrations, customizations, as well as providing ongoing day 2 support services.
- Move and improve your non-Oracle and Oracle technologies to Oracle Cloud leveraging BIAS' leading processes.
- Demonstrate Oracle Cloud features that support your enterprise needs.

Whether you're a fortune 500 company requiring a complex cross-platform migration or a mid-size company migrating to a similar platform, BIAS has the expertise and experience to ensure a seamless and cost-effective migration to the cloud. Our migration factory has successfully migrated thousands of databases. We also supply the infrastructure, network, data security and E-Business Suite (EBS) application expertise to ensure that all components, including EBS integrations/ enhancements, are migrated successfully to a secure and high-performing environment.

Our experience in migrating and providing Managed Services for E-Business Suite customers allows us to design the reference architecture and capacity sizing to meet your requirements. We then implement the architecture and migrate the environments to ensure that you fully realize the financial and operational benefits from moving to the cloud. Our OCI certified consultants, combined with the Migration Factory's Digital Platform Automation and repeatable methodology, provide a complete solution that minimizes overall project risk and accelerates the time to realizing benefits.

KEY DELIVERABLES

- ✓ **STRATEGY:** Workshop to map your network, security, database, applications and migration requirements to a scalable, high performing, highly redundant architecture.
- ✓ **MIGRATION:** Move Oracle E-Business Suite, Oracle Database, operating system and non-Oracle applications to Oracle Cloud PaaS or IaaS via multiple rounds of migration and user testing.
- ✓ **NEW ENVIRONMENT:** Provide high performing, high availability environments to exceed user expectations, support growth requirements and meet your business objectives.
- ✓ **DOCUMENT:** Capture architecture and support processes to provide automation templates that support future management and/or provisioning of environments.

WHY BIAS

Our solution experts enable you to realize competitive value from your Oracle Cloud investments. We provide your business with tightly integrated, comprehensive, superior services throughout your entire Cloud migration experience. In addition, we delivered one of the largest, cross-platform Oracle EBS migrations to OCI that was recognized globally with the 2019 Oracle Excellence Award for Partner of the Year in OCI.
